

## TECHNICAL CHARACTERISTICS

### Compatibility

ITU-TS Group 3

### Transmission speed

9600 BPS (FAX-LAB 310 SMS), 14400 bps (FAX-LAB 360 SMS), both with Automatic Fall Back to 2400 bps

### Transmission time per page (\*)

9 seconds (FAX-LAB 310SMS), 7 seconds (FAX-LAB 360 SMS)

### Compression method

MH, MR, MMR

### Original document format

A4

### Automatic Document Feeder (ADF)

15 pages

### Scanning resolution

Standard, Fine

### Contrasts Control

Manual

### Greyscale

16 levels (FAX-LAB 310 SMS),  
64 levels (FAX-LAB 360 SMS)

### One touch / abbreviated dialling

10 / 50

### Document memory (\*)

28 pages

### TX from memory

Yes

### Broadcasting

1 document up to 10 destinations

### Deferred transmission

1 document up to 10 destinations from memory, 1 document to 1 destination from the ADF

### Copy speed (\*)

2 copies per minute

### Paper tray

50 sheets

### Substitute reception in memory

Yes

### Polling TX / RX

Yes

### Automatic switching

Fax/Telephone and Answerphone/Fax

### Error Correction Mode (ECM)

Yes

### Display

2 lines x 16 characters, supplying procedure guidelines

### Telephone features

Caller identification, mute/hold functions, silent reception, hands-free conversation (FAX-LAB 360 SMS only)

### Copier function

Specific keyboard command, multiple copying up to 9 copies, zoom 50%, 70%, 100%, 140%

### SMS compatibility

ETSI 210 912

### SMS editing

Through characters on the numeric keys

### SMS format

160 and 640 characters

### SMS despatch

To mobile phone, fixed telephone devices, e-mail addresses, fax numbers

### SMS reception

Storage up to 30 income messages, with automatic print out upon reception or manual

### SMS confidential handling

Through key word system

### Digital Answerphone (FAX-LAB 360 SMS only)

Storage capacity 15 minutes, 3 courtesy announcements, remote access, transfer of the voice messages to a pre set number, recording of personal voice memos

### Other features

**MORE THAN A DESKTOP PHONE**

The Olivetti FAX-LAB 310 SMS and 360 SMS lead the way in innovative telephone fax equipment, with the focus on compact dimensions and intelligent design. Thanks to a fold-up paper tray, they take up little more room than a standard handset. And they provide all the latest phone functions: caller identification on display, list of calls made, mute, phone book for storage of 60 numbers. The FAX-LAB 360 SMS also features a practical digital answerphone with a large memory, remote access, message transfer to a pre-set number and storage of personal voice memos.

**MORE THAN A PLAIN-PAPER FAX**

The Olivetti FAX-LAB 310 SMS e 360 SMS implement state-of-the-art ink-jet fax technology. With all the benefits this provides, beginning with security. Incoming fax often contain confidential information: ink-jet is the only technology that ensures that no-one else will read the fax, because no record of the printed documents is kept in the machine. As for running costs, ink-jet technology uses only the minimum amount of ink needed to print incoming fax; and since thermal printheads are not needed, energy consumption is much lower

than with other plain-paper printing technologies. Maintenance could not be easier: replacement of the printhead is an intuitive procedure that takes only a matter of seconds. Then there's quality and versatility: ink-jet printing is unbeatable on any type of office paper, even recycled stock. In addition to the evident advantages of ink-jet printing, the FAX-LAB 310 SMS and FAX-LAB 360 SMS feature a 28-page document memory, a 15-page document feed and a 50-sheet paper tray. The FAX-LAB 360 SMS model also provides a 14,400 bps modem that transmits a page in just seven seconds!

**THE REVOLUTION IS IN THE MESSAGE\***

The real innovation on the Olivetti FAX-LAB 310 SMS and 360 SMS is the ability to support SMS messages for communications with mobile phones, fixed phones and even email addresses. With the greatest of ease and a large format from 160 to 640 characters. Both models can store up to 30 incoming SMS, with automatic or manual printing if required. Special keywords ensure confidentiality.
