**OLIVETTI d-COPIA 25
DIGITAL PHOTOCOPIER**

olivetti
@HOME@OFFICE

DO YOU WORK IN A SMALL OFFICE OR FOR YOURSELF AND RELY ON PHOTOCOPIES? THEN YOU NEED ME. WITH MY NEW LOOK AND GREAT PERFORMANCE, I FIT INTO ANY WORK ENVIRONMENT AND DELIVER CAPABILITIES WORTHY OF A DEPARTMENTAL COPIER. YOU CAN COUNT ON SPEED WITH MY IMPRESSIVE NUMBER OF PAGES PER MINUTE. NOBODY CAN BEAT ME ON COST PER COPY: MY INNOVATIVE DRUM, TOGETHER WITH THE TONER UNIT, MEANS I GO ON FOR AN INCREDIBLY LONG TIME! WHAT'S MORE, PUT ME ON LINE AND I BECOME A PRINTER AND HIGH-SPEED SUPERG3 FAX. THAT'S NOT ALL: I CAN HANDLE BACK-FRONT COPYING, BINDING AND STAPLING, AND MY MAILBOX OPTION BOOSTS WORKPLACE PRODUCTIVITY.

200-sheet bypass for increased flexibility

easy connection for multiuser environments

NEW LOOK AND GREAT SAVINGS

With its elegant, innovative design, the Olivetti d-Copia 25 fits perfectly into any workplace and its incredibly low consumption levels translate into a very efficient cost per copy. In fact, the toner and drum unit deliver record-breaking durability, well above the levels you are used to today. This is the result of technological innovation by Olivetti, the leader in digital copying.

GREAT COPY QUALITY

The Olivetti d-Copia 25's laser technology ensures outstanding quality levels, not only for copying but also when printing: with 256 shades of gray and 600x600 dpi, copies are always faultless reproductions of the originals, even for images and photographs.

GREAT MULTIFUNCTIONAL PERFORMANCE

All in one machine? The Olivetti d-Copia 25 doesn't just give your office a digital copier: put it on line and you can use it as a printer, a high-speed SuperG3 fax and, last but not least, as a scanner. All these high-performance functions are perfectly easy to manage thanks to the new console's touch-screen, which allows you to organize all the machine's operations in a straightforward user-friendly way.

The fax modem has a top speed of 33.6 kbps and you can send a fax while you're copying.

The Olivetti d-Copia 25 is compatible with all the main operating systems: Windows 95/98 and NT; Novell Netware and MacOS. So it can be used concurrently in multi-platform environments and be simultaneously accessed from any workstation, allowing users to send and receive documents.

GREAT AUTONOMY

The Olivetti d-Copia 25 is the perfect machine to avoid running out of paper. Its two 500 + 500-sheet trays together with a 200-sheet bypass allow you considerable autonomy, which you extend with two more universal 500-sheet trays, for a truly inexhaustible paper supply.

OLIVETTI WORLDWIDE ASSISTANCE

With the d-Copia 25, print and copy quality is guaranteed on every page, not to mention easy maintenance from replacing toner to changing paper. And, so you can keep an eye on everything, the console keeps you constantly informed on the state of the machine. And whatever you might need, you only have to ask: your Olivetti Dealer will answer all your questions.
